

ReadyBath® Bathing Systems & Premoistened Wipes

The ReadyBath bathing system is an all-in-one, pre-moistened, disposable washcloth method intended for efficient and thorough patient bathing.

The single-use pouch contains eight pH balanced, hypoallergenic and alcohol-free washcloths that eliminate the need for rinsing or drying.

Not only does this save valuable nursing time, but it also reduces the costs associated with maintaining linen quotas, not to mention related items such as soaps and moisturizers.

The disposable nature of the product eliminates the incidence of cross-contamination. The antibacterial formula kills germs and eliminates odours.

Product Features:

ReadyBath

- Pre-moistened, ready-to-use bathing system
- Cleans, moisturizes and conditions the skin (contains allantoin and phospholipids)
- pH balanced, hypoallergenic and requires no rinsing or drying
- Single-use pouch helps reduce cross-contamination
- Saves valuable nursing time

ReadyCleanse

- Pre-moistened with a rinse-free, hypoallergenic and pH balanced formulation
- 24 count package to reduce waste
- Economical alternative for quick clean-ups

ReadyBath Shampoo Cap

- Contains one disposable shampoo cap
- Rinse-free method

ReadyBath® Bathing Systems & Premoistened Wipes

Saves Valuable Nursing Time

ReadyBath allows nurses to better manage their time caring for patients as they no longer need to assemble the multiple items needed for a bath, run water to temperature, dry the patient and cleanup. Also, because ReadyBath contains moisturizers, application is not necessary.

Improves Skin Care

Patients with skin sensitive to the motion of washcloths and towels prefer ReadyBath as it is a minimally invasive method for bathing. Because ReadyBath contains moisturizers and conditioners (allantoin and phospholipids) for the skin, potentially harsh soaps are not needed.

Decreases Exposure to Harmful Bacteria

ReadyBath helps to decrease the likelihood of in-hospital bacterial infection by removing the need for reusable plastic wash basins, which are known to contaminate.

ReadyCleanse Wipes

ReadyCleanse wipes can be conveniently placed bedside to provide quick cleanup of incontinent episodes and other accidents. The wipes are made from soft, spunlace cloth and are premoistened, hypoallergenic and pH balanced.

ReadyBath Shampoo Cap

ReadyBath Shampoo Cap is a rinse-free method for washing hair. The package includes conditioner and one disposable shampoo cap.

Technical Specifications

ReadyBath (P/N MD01)

- 8 cloths per pack/24 packs per case
- Resealable packaging

ReadyCleanse (P/N MD02)

- 24 cloths per pack/24 packs per case
