

scrubEx is an inventory control system that manages scrub suit usage and practically eliminates scrub losses and unauthorized users.

The system improves the distribution of scrub suits by providing the correct size to each authorized member of the medical staff 24 hours a day, seven days a week.

With the scrubEx system, money spent on laundering scrub suits for unauthorized users or on lost, stolen or unreturned surgical garments is recaptured.

scrubEx is a compact unit that fits practically anywhere; it is convenient, easy to use and dispenses and receives scrub suits in seconds. A variety of models are available, holding up to 128 scrub suit sets plus an optional packer. The dispenser and receiver can be located separately. Models have a video recording option that can record each deposit.

Product Features:

- Eliminates scrub suit losses and unauthorized users
- Convenient and easy to use
- Dispenses and receives scrubs in seconds
- Can hold up to 128 scrub suit sets; servicing up to 170 users a day
- Available with an optional packer
- Dispenser and receiver can be located separately
- Video recording option
- User access: hospital ID, bar code, magnetic stripe, proximity card & keypad backup
- "Real-time" communication through hospital network
- Approvals: UL & CSA certified, FCC compliant, OSHPD compliant

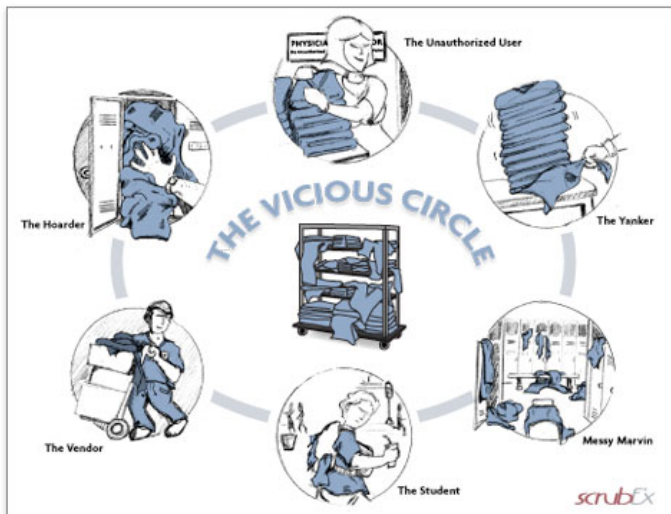

Convenient & Easy to Use

Similar in concept to an ATM machine, scrubEx is a computer-controlled system of combined or independent dispenser and receiver units strategically placed throughout a hospital.

Access is controlled through the use of personal identification codes and scrub inventory levels are updated in real time.

These and other parameters are monitored and controlled via a dedicated management computer located anywhere inside or outside the hospital.

scrubEx LV (Large Volume) Receiver

- Clean scrub capacity: N/A
- Soiled scrub capacity: 150-160 sets with packer option, 50-60 sets without packer option
- Dispense time: N/A
- Load time: N/A
- Footprint: 16.5"D x 51"W x 78"H

scrubEx MV (Medium Volume) Dispenser/Receiver

- Clean scrub capacity: 64 sets; accommodates 85 users a day with 2 fills per day
- Soiled scrub capacity: 50-60 sets with standard packer
- Dispense time: 5.4 seconds
- Load time: 7 minutes
- Footprint: 16.5"D x 52"W x 78"H

scrubEx SV (Small Volume) Dispenser/Receiver

- Clean scrub capacity: 32 sets, accommodates 40 users a day with 2 fills per day
- Soiled scrub capacity: 35-40 sets
- Dispense time: 5.4 seconds
- Load time: 5 minutes
- Footprint: 16.5"D x 52"W x 71"H
